The Aged Lead Quick-Start Kit

Your One-Page Guide to Turning Aged Leads Into Closed Deals

From HowToWorkLeads.com — The Aged Lead Playbook

What Are Aged Leads?

Aged leads are prospects who submitted an inquiry — for insurance, a mortgage, solar, or another product — anywhere from 30 to 180+ days ago but were never contacted, never closed, or fell out of another agent's pipeline. They cost 80-95% less than real-time leads, and because most agents give up after one or two attempts, these prospects are still reachable and still have needs.

Why they work: The original problem (needing insurance, wanting a better rate, considering solar) rarely disappears. Life just got in the way. Your job is to show up at the right time with the right message.

Where to Buy Aged Leads

Source Type	Examples	Typical Cost	Best For
Dedicated aged lead vendors	AgedLeadStore.com	$0.15 - $2.00/lead	Agents who want volume + quality control
Lead aggregators	Various online marketplaces	$0.50 - $5.00/lead	Agents testing multiple verticals
Direct from carriers/LOs	Networking, industry contacts	Negotiable	Experienced agents with relationships
Your own recycled leads	Past prospects in your CRM	Free	Anyone with an existing database

Our recommendation: Start with a dedicated vendor like AgedLeadStore.com where you can filter by vertical, geography, age of lead, and lead type. Buy a small test batch (50-100

leads) before scaling.

3 Phone Scripts That Work

Script 1: Insurance (Life, Health, Medicare)

> *"Hi [Name], this is [Your Name] with [Company]. I'm reaching out because a few months back you looked into [life insurance / health coverage / Medicare options] online. I know that was a while ago — are you still looking for the right plan, or did you get that taken care of?"*

If yes: "Great, what's been the biggest challenge in finding the right fit?"

If no: "No problem at all. Just so you know, rates have actually changed since then, and I might be able to find you something better than what you have. Would it be worth a quick 5-minute comparison?"

Script 2: Mortgage (Purchase or Refinance)

> *"Hi [Name], this is [Your Name] with [Company]. I'm calling because you inquired about [a home purchase / refinancing] a little while back. I know timing is everything with mortgages — are you still in the market, or did you already get that sorted out?"*

If still looking: "Perfect. What's been the holdup — is it rates, finding the right home, or something else?"

If already closed: "Congrats! Just curious — are you happy with the rate you locked in? A lot of people I talk to find out they left money on the table."

Script 3: Solar

> *"Hey [Name], this is [Your Name] with [Company]. You looked into solar panels for your home a few months ago — I wanted to check in because we have some new*

> *incentive programs that weren't available back then. Are you still thinking about going solar?"*

If yes: "Awesome. The biggest thing that's changed is [mention current incentive — tax credit, local rebate, new financing]. Can I run a quick savings estimate for your home?"

If no: "Totally understand. Most homeowners I talk to didn't realize they could lock in [incentive] before it expires on [date]. Would it be worth seeing what you'd save?"

Your 7-Day Follow-Up Schedule

This is the minimum cadence for every aged lead you purchase. Most agents quit after 1-2 attempts. You will not.

Day	Action	Channel	Time
Day 1	Call + Voicemail + Text	Phone + SMS	10:00 AM local
Day 2	Email (value-first)	Email	8:00 AM local
Day 3	Call (no VM)	Phone	4:30 PM local
Day 4	Text message	SMS	11:00 AM local
Day 5	Email (social proof)	Email	9:00 AM local
Day 6	Call + Voicemail	Phone	12:00 PM local
Day 7	Break-up email	Email	8:00 AM local

Key principle: Vary your timing and channel. If morning calls don't connect, try afternoon. If they don't answer the phone, they might respond to a text. The multi-touch approach is what separates top performers from everyone else.

After Day 7: Move to a long-term nurture sequence — one touch per week for 4 weeks, then monthly. Some of your best deals will close 30-60 days into the nurture.

Top 5 Mistakes to Avoid

Mistake #1: Treating Aged Leads Like Fresh Leads

Aged leads don't need urgency pressure. They need relevance. Acknowledge the time gap. Say "I know this was a while ago" — it builds trust instantly because you're being honest.

Mistake #2: Giving Up After One Call

The average aged lead converts between touch 5 and 12. One call and done is literally throwing money away. Follow the 7-day cadence above — every single time.

Mistake #3: Not Filtering Before You Dial

Spend 10 minutes scrubbing your list before you start calling. Remove disconnected numbers, check for duplicates, and prioritize leads with complete contact info (name + phone + email). Your connect rate will jump 20-30%.

Mistake #4: Leading With Your Product Instead of Their Problem

Don't open with "I'm calling about a great life insurance policy." Open with their situation: "You were looking into coverage a while back — did you ever get that handled?" Let them tell you what they need.

Mistake #5: Buying Too Many Leads Too Fast

Start with 50-100 leads per week. Work every single one through the full 7-day cadence before buying more. Agents who buy 500 leads and cherry-pick the easy ones waste 80% of their investment. Volume comes after you've built the habit of consistent follow-up.

Quick-Reference Numbers

- **Average connect rate on aged leads:** 8-15% (vs. 3-5% for cold calling)
- **Average conversion rate:** 2-5% of purchased leads (with proper follow-up)
- **Cost per acquisition:** Often 50-70% lower than real-time leads
- **Sweet spot for lead age:** 30-90 days old (best balance of cost and contact rate)
- **Touches needed to convert:** 5-12 on average
- **Best call times:** 10-11 AM and 4-5 PM local time, Tuesday through Thursday

Your First Week Action Plan

1. **Buy 50 aged leads** from AgedLeadStore.com in your vertical and geography
2. **Scrub the list** — remove incomplete records, check for DNC
3. **Load into your CRM** or a spreadsheet with columns for each day's touchpoint
4. **Start Day 1** of the follow-up cadence for 10 leads per day
5. **Track everything** — calls made, connections, appointments set, deals closed
6. **Review results after 7 days** — calculate your connect rate and cost per conversation
7. **Adjust and scale** — buy more leads once you're consistently working the full cadence
